IT Operations | Digital Workplace | ServiceNow CSA | ITIL v4 | EUC | Vendor Governance

## PROFILE

For 12 years, the technology function at Korn Ferry's Mumbai executive hub ran without a single escalation to senior leadership. Senior Partners and Managing Directors had one accountable point for every technology outcome. Defined the on-site IT service model, vendor governance framework, and operational standards that held through multiple acquisitions and four office relocations. ServiceNow Certified System Administrator (CSA) August 2026. ITIL v4 Foundation January 2026. Operated within Korn Ferry's BSI-certified ISO/IEC 27001 framework.

## CORE COMPETENCIES

|                                   |                                 |                         |

| Office Relocation Leadership      | Acquisition Integration Support | BC/DR Planning          |

## PROFESSIONAL EXPERIENCE

### Korn Ferry

Mumbai, India

IT Operations Lead, EUC & Digital Workplace | Oct 2013 – Oct 2025

- **IT service delivery:** Accountable for the complete digital workplace function at Korn Ferry's Mumbai hub. Coordinated delivery across specialist central teams covering infrastructure, network, and identity, while holding sole accountability for on-site service outcomes. 98%+ SLA sustained throughout tenure.
- **Endpoint management:** Owned the full Windows and macOS endpoint lifecycle, including Microsoft 365 client configuration across the application suite. Imaging, deployment, patching, and secure decommissioning for the Mumbai hub and remote teams across India. 100% Day-1 readiness on every hire.
- **ServiceNow operations:** Sole platform practitioner across Incident, Problem, Request, Asset, and CMDB modules for 12 years. Defined service standards, maintained runbooks, and improved service quality continuously across the full stack. Formalised platform expertise through CSA certification in August 2026.
- **CMDB and asset governance:** 100% asset accuracy maintained across hardware, peripherals, software licences, and subscriptions through multiple acquisitions and four office relocations. The record did not move.
- **Identity and access governance:** Full user provisioning and de-provisioning lifecycle managed through ServiceNow workflows. AD access coordinated via global ServiceDesk with strict segregation of duties. Zero access exceptions across tenure.
- **Vendor and MSP governance:** Primary interface for all technology vendors and managed service providers. Managed contract lifecycles, renewal negotiations, and AMC documentation to maintain cost-effective, SLA-governed service delivery.
- **Project delivery, office relocations (x4, 2015–2023):** Led technology project delivery across four office moves. Scope definition, vendor coordination, endpoint migration, and Day-1 handover for 50–55 staff per relocation. Zero operational disruption on each.
- **Acquisition integration:** Managed IT continuity through multiple acquisitions, covering user migration, device standardisation, and software alignment. 100% CMDB accuracy and uninterrupted service delivery held through every transition.
- **BC/DR:** Maintained and operationalised business continuity and disaster recovery procedures throughout tenure. Zero data loss or service-impacting incidents.

**Team Computers** Senior IT Support Engineer
